

## About Us

Galaxy Windows is a family owned and operated business built on values that inspire true quality and craftsmanship. Founded in 1999, we began producing PVC windows with the goal of providing an excellent experience for every customer's needs with the deserved respect and care. By prioritizing the customer over the bottom line, Galaxy Windows has established itself as a company you can trust.

Our team challenges the industry by taking on projects of any size without sacrificing quality products or services. We proudly use components and supplies from other Canadian companies to contribute to our business and to the Canadian economy. To the advantage of our customers, being a small business allows production to be under the direction of the owners themselves. The pride we take in operating Galaxy Windows inspires the same pride in our customers.

Take pride in your home and invest in Galaxy Windows.

## Certifications & Associations

Ask about our qualified products with the ENERGY STAR® symbol. It shows that the product meets or exceeds ENERGY STAR® guidelines for energy efficiency.

Quality Auditing Institute is an independent testing, inspection, and certification organization. Accredited by the Standards Council of Canada, QAI evaluates and certifies products according to CSA and other recognized standards.

Fenestration Canada upholds high ethical and technical standards in window and door manufacturing and distribution.

## CP900 Series PVC Casements, Awnings, & Pictures

Exclusive to Galaxy Windows, the CP900 series offers your home superior energy efficiency and maximized ventilation with the additional bonus of low maintenance. The CP900 Series can be customized to meet the needs of any home.

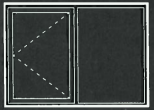

Exterior view

- The fusion welded CP900 Series has a multi-chamber design with main walls up to 40% thicker than other window systems for superior weld strength and maximum performance.
- Triple weather-stripping ensures protection from outdoor elements, maximizing energy efficiency.
- A consistent seal from top to bottom is provided with a standard multi-point locking system, allowing for security and weather resistance with a single lock lever.
- Egress hardware is available for casement windows.
- Screens contain spring-loaded fasteners to provide easy installation and removal, while still maintaining a sleek aesthetic.
- To maximize energy efficiency, dual glazing or triple glazing is available with your choice of solar control or solar gain Low E options.
- Window configurations can combine casement, awning, and picture windows in a variety of ways.
- Add architectural character to any room with a specialty window. Options include bays, bows, or shaped designs.
- Standard frame available in solid colour white or beige (exterior painting options available).

## CP500 Series PVC Sliders

The Galaxy Windows CP500 sliders are an economical option to consider for your home. They are low maintenance and are available in a wide variety of configurations. Whether you are building or renovating, these windows will incorporate into your home with ease.

Interior view with jamb extension

- Fusion welded frame and sash provide maximum strength and performance.
- Dual weather-stripping ensures protection from outdoor elements.
- Double-wheeled brass rollers provide consistent and smooth operation.
- Vertical sliders are equipped with a block and tackle system, allowing the sash to remain open at your preferred height.
- Screens contain spring-loaded fasteners to provide easy installation and removal, while still maintaining a sleek aesthetic.
- To maximize energy efficiency, dual glazing is available with your choice of solar control or solar gain Low E options.
- The CP500 series features horizontal, vertical, or centre-fixed tri-slider configurations. Sashes are removable for easy maintenance.
- Standard frame available in solid colour white or beige (exterior painting options available).

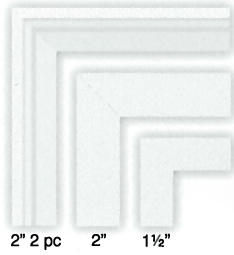

# Exterior & Interior Options

With a variety of exterior and interior options, you can create a customized look perfect for your home.

## PVC Brickmould

Increase the character of your home by adding brickmould to your windows, available in a range of sizes and colours.

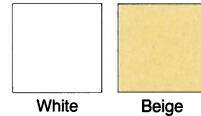

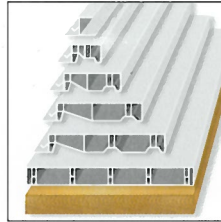

Nail fin available on 2" brickmoulds and 1½" brickmoulds. Slope sill available on all 2" brickmoulds.

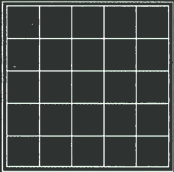

## Interior

We customize jamb extensions in PVC and unfinished wood to your individual needs. Drywall return is also available for alternative interior finishes.

# Glass & Grill Options

Enhance the efficiency and comfort of your home by upgrading the glass in your windows. Standard options include solar gain or solar control Low-E glass, with argon gas filling as an additional option. Select the upgrades that benefit your home.

Solar gain Low-E glass harnesses the benefits of the sun, heating and lighting your home naturally. Without compromising the transmission of visible light, this Low-E option will limit the intrusion of harmful UV rays, offering fade protection for interior furnishings.

Solar control Low-E glass insulates your home with a better U-value, limiting the amount of heat infiltration from the sun and keeping a consistent temperature for a more comfortable home in any season. The glass is able to transmit visible light into your home and simultaneously offer superior UV protection.

Guarantee the comfort of your home with upgraded glass.

## Obscure Glass Options

Consider an obscured glass to increase privacy and comfort in your home.

Rain
